INSURANCE

Please join us for a great day of vital and informative safety classes (in English and Spanish) designed specifically for the wine industry. Lunch is provided.

CLASSES

Confined Space

An employer must conduct this Cal OSHA (T8 CCR 5157 & 5158) required annual training for anyone who will make bodily entry into any confined spaces, such as tanks and pits. During this session, we will discuss the use of respirators, permitting processes, and atmospheric gas monitors. Participants will receive a Certificate of Attendance for their participation to present to their employer.

Lock Out/Block Out (LOBO)

This Cal OSHA (T8 CCR 3314) annually required training for all winery workers covers the safe de-energization of powered equipment/machinery in the winery for the purpose of conducting service, sanitizing/cleaning, and repair work. This LOBO training complies with the Cal OSHA [3314 (I), (1)] "Authorized Employee Requirements". Participants will receive a Certificate of Attendance for their participation to present to their employer.

Forklift (Powered Industrial Truck) Certification & Recertification

Anyone operating a forklift in a winery is required by Cal OSHA (T8 CCR 3650 & 3668) to have forklift operator's certificate on file verifying competency. After a classroom session, passing a written test and skills evaluation (must have previous experience), the operator will receive a Certificate of Competency valid for three years.

Adult-Only First Aid/CPR/AED

Cal OSHA (T8 CCR 3400) requires supervisors who manage/supervise employees to have current Adult-Only First Aid CPR/AED certification. CHIPP also requires that supervisors with First Aid/CPR training be available to assist employees with heat illness symptoms. We will cover basic adult first aid and CPR/AED techniques to stabilize an injured worker for first responders. Participants will receive an Adult-Only First Aid/CPR/AED certification card and certificate from the American Red Cross that is valid for two years.
